

# Tracking Seminar Handout

By Mike Paetzold  
Courtesy of [Affiliate Funnel](#)

This has been put together to allow listeners of the podcast from the Affiliate Funnel News to follow along with the discussion. Our seminars take place in an online conference room where everyone can see an actual screen.

Attending the seminars is much more valuable if at all possible because the discussion continues after the recording stops. The interaction and the networking with others is invaluable.

### Frame Breaker Test

**Note:** You must validate your Trker URL before it can be added to your rotator. Click on the box () that appears under the Valid column. Once your URL has been successfully validated,  will appear. URL validation takes less than 15 seconds. Please turn off any pop-up blocker/killer software that you have running as this will not allow you to validate your URL. After a URL has been validated you can then add it to your rotator.

= url **not** validated     = url validated
